

LEADERSHIP PORTFOLIO

LEADING PEOPLE. INSPIRING CHANGE. BUILDING A BETTER FUTURE.

PREPARED BY | Rami Faisal Abu Sadaa

YEAR | 2026

PREPARED FOR | UNESCO

PROGRAM / INITIATIVE | Leadership Programme

1-Executive Summary

Rami Faisal Abu Sadaa is an educational leader and community development practitioner with extensive experience in designing, leading, and implementing educational, youth, and community initiatives. Throughout his professional journey, he has combined leadership, education, technology, and project management to create meaningful learning environments and sustainable community impact.

His experience includes leading educational centers, coordinating school-based initiatives, supervising educational teams, delivering leadership training, organizing large-scale community events, and integrating technology into educational practices. He has also managed volunteer teams and collaborated with educational institutions, NGOs, and international organizations in planning and implementing development projects.

Rami believes that leadership is not a position but a responsibility built on service, integrity, innovation, teamwork, and continuous learning. His leadership philosophy focuses on empowering people, building collaborative environments, solving problems creatively, and transforming ideas into measurable results.

This Leadership Portfolio documents selected experiences, achievements, projects, and evidence that demonstrate his leadership journey and commitment to educational excellence and community development.

> **"Leadership is measured not by authority, but by the positive impact we create in the lives of others."**

About Me

I am an educational leader and community development practitioner with a strong passion for empowering young people through education, leadership, and innovation. Throughout my professional journey, I have designed and led educational programmes, coordinated community initiatives, managed multidisciplinary teams, and delivered leadership training aimed at creating sustainable impact.

My experience spans educational leadership, project management, youth empowerment, digital education, and community engagement. I believe that effective leadership is built on integrity, collaboration, continuous learning, and the ability to inspire others to achieve meaningful change.

I am committed to developing innovative educational environments, strengthening community partnerships, and transforming ideas into practical initiatives that improve people's lives. Through every project I lead, I strive to build capable teams, encourage creativity, and create opportunities for growth, participation, and positive social impact.

Areas of Expertise

- Educational Leadership
- Community Development
- Project Management
- Leadership Training
- School Leadership
- Youth Development
- Educational Technology
- Team Leadership
- Community Engagement
- Event Management

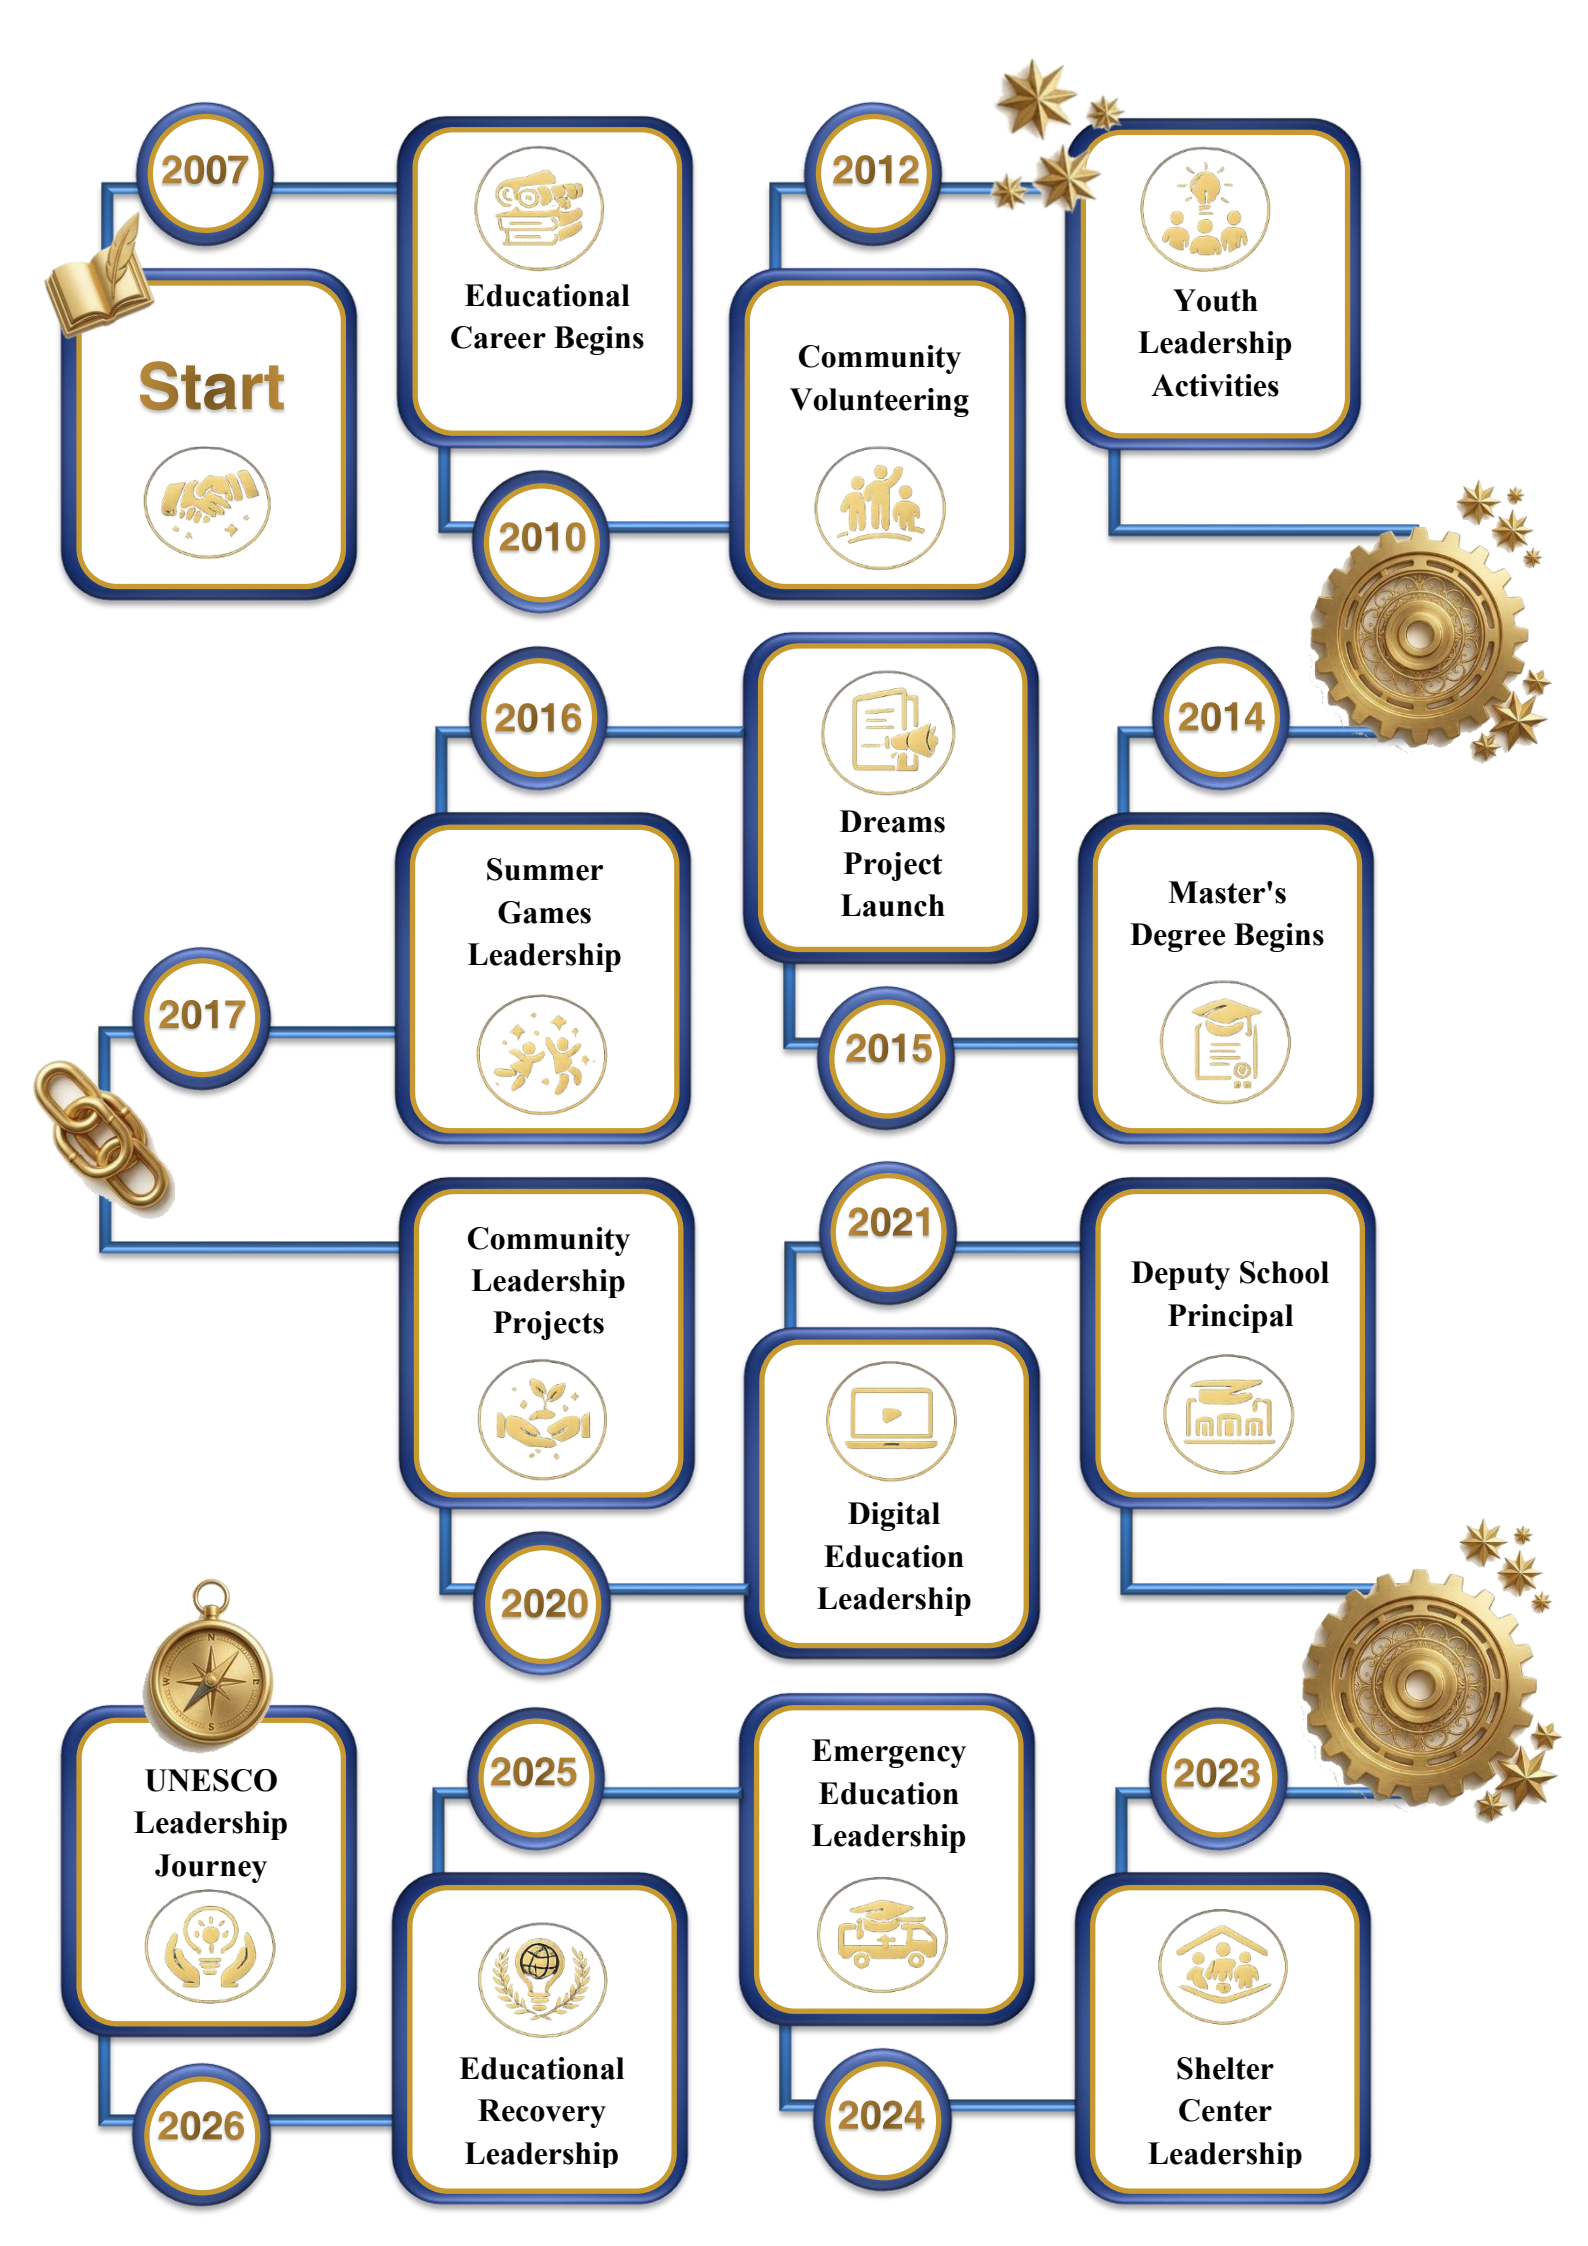

Professional Identity

An educational leader committed to empowering individuals, developing future leaders, and transforming educational challenges into opportunities through leadership, innovation, and technology.

Leadership Motto

Leadership is turning challenges into opportunities and vision into action.

> **I believe leadership is the courage to serve, the vision to inspire, and the commitment to create opportunities where others see obstacles.**

3-Leadership Experience

My leadership philosophy is built on one principle: empower people, create opportunities, and build systems that continue creating impact beyond the individual leader.

Leadership Approach

- Vision
- Service
- Innovation
- Collaboration
- Sustainable Impact

Leadership Focus

- Educational Leadership
- Community Leadership
- Digital Transformation

"Every challenge is an opportunity to lead, every opportunity is a chance to create lasting impact."

4-Leadership Experience

01 Deputy School Principal

UNRWA Schools

2021 – Present | Gaza, Palestine

- Led school operations and supported educational teams.
- Coordinated learning initiatives and school activities.
- Promoted teamwork, discipline, and student development.

02 Digital Education Leader

School-Based Digital Learning

2020 – 2021 | Gaza, Palestine

- Supported teachers during remote learning challenges.
- Helped organize digital education practices and tools.
- Used technology to maintain learning continuity.

03 Community Project Leader

Community Initiatives

2017 – Present | Gaza, Palestine

- Designed and coordinated community service initiatives.
- Built partnerships with schools and local organizations.
- Led activities focused on children, education, and service.

04 Emergency Education Leader

Emergency Learning Center

2024 – 2025 | Gaza, Palestine

- Led learning activities under difficult emergency conditions.
- Supported teachers and students with minimal resources.
- Helped restore education and hope during crisis.

5-Shelter Center Leadership

Leading Emergency Shelter Operations Under Severe Crisis Conditions

Role: Shelter Center Leader / Emergency Shelter Coordinator
Organization: UNRWA Shelter Center
Location: Gaza, Palestine
Period: 8 October 2023 – 15 January 2024
Context: Wartime emergency displacement and shelter management
Target Group: Displaced families, children, school-age youth, and vulnerable community members

During the war, I led and coordinated shelter center operations under highly complex emergency conditions. The center hosted displaced families who were facing severe humanitarian, psychological, social, and logistical challenges. My role required continuous field coordination, daily problem-solving, team supervision, communication with institutional leadership, and direct engagement with the urgent needs of displaced families.

My leadership responsibilities included organizing available spaces, coordinating with staff and volunteers, following up on urgent shelter needs, supporting daily psychosocial and recreational activities for children, maintaining communication with UNRWA field leadership, and helping preserve a minimum level of order, dignity, and community resilience inside the shelter environment. During this period, formal education was suspended. Therefore, the focus inside the shelter was on protecting children's psychosocial stability, supporting safe engagement, strengthening family communication, organizing services, and maintaining community order under emergency conditions.

A key moment in this experience was the field visit of UNRWA senior operations leadership to the shelter center. During the visit, I participated in extended discussions and field walkthroughs to present the center's operational challenges, community needs, space

conditions, and emergency priorities. This visit provided visual and institutional evidence of my role in representing the shelter, communicating needs, and coordinating under pressure.

Key Responsibilities

- Coordinated daily shelter operations under emergency conditions.
- Supported the organization of spaces used by displaced families.
- Communicated urgent shelter needs to senior field leadership.
- Worked with staff and volunteers to maintain order and service continuity.
- Supported daily psychosocial, recreational, awareness, and community-support activities for children and families.
- Helped organize aid distribution processes, service queues, cleanliness activities, and space-management efforts.
- Conducted follow-up meetings with the shelter team and communication meetings with parents.
- Participated in field assessments and guided walkthroughs during institutional visits.
- Helped transform limited school/shelter spaces into functional emergency environments that supported dignity, safety, and community stability.

Quantitative Details

- **Estimated number of displaced persons hosted:** 3,643
- **Estimated number of families hosted:** 668
- **Number of children and school-age youth hosted/served:** 1,427
- **Number of staff and volunteers coordinated:** 53
- **Duration of shelter leadership role:** Approximately 3 months
- **Daily activities and support operations:** 1–2 structured daily activities, in addition to continuous daily support operations related to psychosocial support, recreational activities, awareness sessions, aid distribution, queue organization, team follow-up, parent communication, cleanliness, and space organization.

- **Number of institutional field visits/meetings:** 20+

Leadership Impact

This experience strengthened my capacity to lead under pressure, communicate with institutional stakeholders, organize people and spaces during emergencies, and support community resilience in conditions of severe uncertainty. It reflects a practical model of crisis leadership where educational leadership expanded into humanitarian coordination, child protection support, family communication, team management, and community stability.

By leading shelter operations during wartime, I learned how to make decisions under pressure, coordinate limited resources, represent community needs before institutional leadership, and protect human dignity in an environment marked by displacement, overcrowding, uncertainty, and psychological stress.

See Visual Evidence Section for supporting documentation.

UNRWA Director of Operations visiting our shelter center during the war to inspect field conditions, review the operational workflow, and assess the situation and urgent needs of displaced families hosted at the center.

Following the field visit, I participated in an extended meeting with the UNRWA Director of Operations to review service gaps and strengthen coordination among relevant departments, with the aim of improving the quality, organization, and responsiveness of services provided to displaced families.

The shelter team at the start of a working day, preparing to carry out assigned tasks. Their smiles, despite the war and hardship, reflected resilience, teamwork, and a deep commitment to serving displaced families.

A simple sheet of paper and a pencil became a moment of relief for a displaced child who had lost so much during the war. During a psychosocial release activity, her smile while drawing reflected the power of small acts of care in restoring a sense of safety, dignity, and childhood amid loss and displacement.

Leading the shelter center was not merely an emergency management experience.

It was a human journey of resilience — restoring dignity, hope, and a sense of life to families who had lost homes, loved ones, belongings, and memories.

6- Educational Center Leadership

Restoring Learning in Temporary Spaces Amid Displacement and Severe Resource Shortage

Returning to My Natural Leadership Role

Role: Director of an UNRWA Educational Center inside the shelter environment
School / Center: Khan Younis Boys Preparatory School "A" (Al-Hourani)
Affiliation: UNRWA
Location: Khan Younis, Gaza, Palestine
Period: 1 August 2024 – 15 June 2026

After shelter centers were organized into specialized roles, each center had a Shelter Manager and an Educational Center Director. I chose to lead the educational center because I felt that students urgently needed a structured learning space during displacement. Shelter-service management was handled by specialized colleagues, while I returned to my natural professional role: leading an educational center inside the shelter environment.

Serving Students from Inside and Outside the Shelter

The center served students from both inside the shelter and the surrounding community. On average, around 100 students came from within the shelter, while approximately 100–150 students came from the surrounding area, depending on the security situation and movement conditions.

Student participation generally ranged between 150 and 250 students. Attendance was not fixed, because it was directly affected by security conditions, movement restrictions, and the level of stability in the surrounding area.

Flexible Emergency Learning Model

The educational center operated across four main phases:

- **Phase 1:** August 2024 – January 2025
- **Phase 2:** February 2025 – July 2025
- **Phase 3:** August 2025 – January 2026
- **Phase 4:** February 2026 – June 2026

The center operated in temporary learning spaces for four hours per day, three days per week. Sessions were organized in morning or evening shifts depending on available space, field conditions, and the overall emergency situation.

Students were grouped by age rather than formal grade level, because student numbers and emergency conditions did not allow full grade-based divisions.

Learning Without Basic Infrastructure

The educational center operated under extremely severe conditions, with almost no basic learning infrastructure available. There were no regular classrooms, seats, textbooks, electricity, internet access, proper boards, chalk, markers, or sufficient stationery.

Students often sat on stones or improvised seating, while temporary learning spaces were created between the tents of displaced families or inside damaged school spaces. Even paper and pens were difficult to obtain, and in some cases, a single pen had to be shared by more than one student.

Teaching Amid Destruction

Despite the absence of normal classroom conditions, teachers continued to support students academically. Boards were hung or placed in improvised ways, damaged rooms were turned into learning spaces, and teachers delivered lessons with very limited tools.

The learning environment was affected by insecurity, bombing, destruction, overcrowding, rain, sun exposure, displacement pressures, and the daily struggle of families to secure basic needs. Yet, learning continued whenever conditions allowed.

Core Learning and Student Support

The educational center provided basic education and learning support for children and adolescents affected by displacement and disrupted schooling. Learning activities focused on core subjects, including Arabic Language, Mathematics, English, and Science.

In addition to academic support, the center provided psychosocial support and counseling to help students cope with the emotional impact of war, displacement, uncertainty, and interruption of normal school life.

Psychosocial Support and Child Engagement

The center was not only a place for lessons. It was also a space where children could interact, participate, express themselves, and regain a sense of routine and emotional safety.

Psychosocial and recreational activities helped students reconnect with childhood, reduce stress, and feel that school still existed as a source of care, structure, and belonging despite the surrounding crisis.

Team-Based Leadership

The educational center team varied from one semester to another according to student numbers and operational needs. Across four phases, I coordinated teams ranging from 10 to 14 members.

The team was composed mainly of teachers, supported by counseling and operational roles. In most semesters, the team included one counselor, one assistant, and the remaining members were teachers. During the first phase, the team included two counselors, one assistant, and teachers. In the third and fourth phases, a school attendant was also assigned to support cleanliness and maintain the daily organization of the learning environment.

Due to the complexity of the emergency environment, responsibilities could not be carried out individually. I divided roles and responsibilities among team members, delegated daily tasks, and followed up on implementation to keep the center operating under severe pressure.

The Impact of Simple Resources

In such conditions, even the smallest resources mattered. A notebook, a pencil, a piece of paper, or a basic learning activity could restore motivation and bring students back into a learning atmosphere.

The value of the center was not measured only by numbers. Its real value was in preserving a structured learning opportunity for 150–250 students whenever conditions allowed, restoring a sense of routine, school connection, psychological safety, and educational hope during a period of severe disruption.

Restoring Confidence in Education

Parents felt reassured that their children were once again connected to education, even under difficult conditions. Teachers also regained a sense of purpose and professional responsibility, as they were able to serve students and contribute meaningfully despite the absence of basic resources.

Overall, the center helped restore confidence in education, strengthen student engagement, support psychosocial stability, and preserve the school's role as a source of hope, structure, and resilience during war.

> **It proved that education can survive even amid war, displacement, fear, and extreme scarcity.**

7- Ahlam Project Leadership

Practical Applications in Developing Young Leaders

Prof. Dr. Iyad Al-Dajani, PhD in Strategic Planning at the Islamic University, the direct supervisor of the Ahlam project.

The Ahlam Project was presented at the Islamic University of Gaza as a distinguished youth leadership initiative.

The project focused on transforming leadership training into practical experiences for young participants.

Practical Applications in Developing Young Leaders

The Ahlam Project was a youth leadership initiative designed to move leadership education from theory into real-life practice. The project focused on helping young participants experience leadership through training, planning, teamwork, ethical values, field activities, community engagement, and practical leadership tasks.

The project was built on the idea that children and young people do not become leaders through lectures only. They need opportunities to practice responsibility, express their ideas, work in teams, plan initiatives, and connect their dreams with meaningful community action.

Through Ahlam, young participants were introduced to leadership concepts, self-confidence, leadership ethics, personal planning, and community service. The project also included practical outputs such as leadership plans, field visits, dialogue sessions, and community partnerships, making it an early milestone in my journey of designing structured youth leadership programmes.

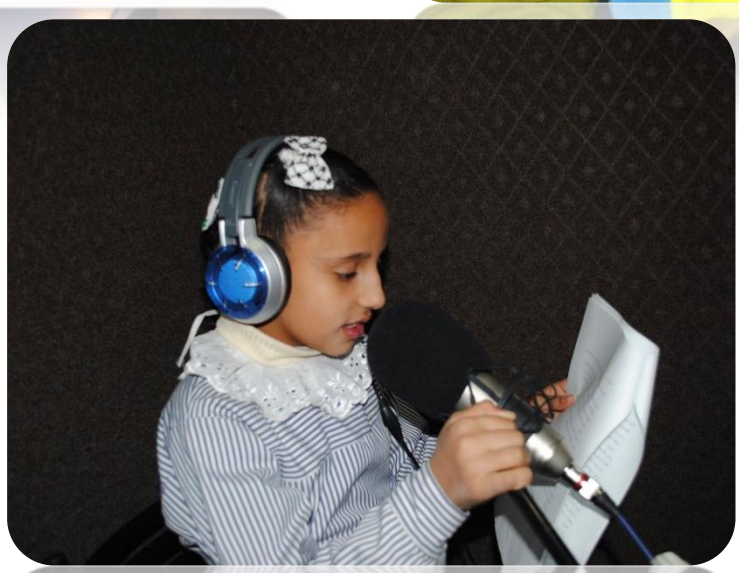

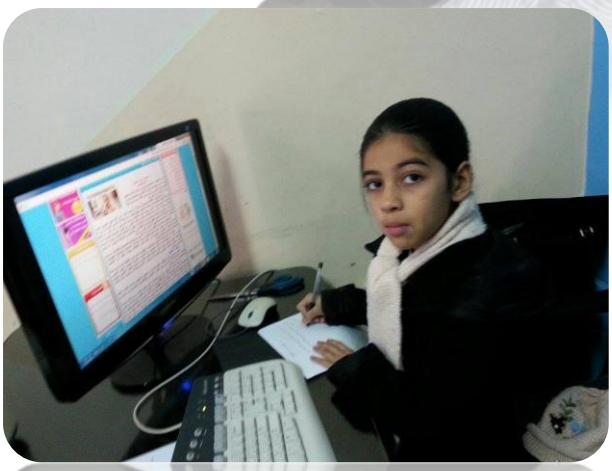

Young leaders during a leadership training session, where they were introduced to the core components, goals, and practical activities of the Ahlam Project.

> **Ahlam was not only a project about leadership. It was a practical space where young people learned how to turn dreams into plans, and plans into community action.**

8- Summer Games Leadership

Growing Through Roles, Responsibilities, and Central Activities

UNRWA Summer Games provided a practical leadership environment where educational, recreational, and community-based activities came together to support children and youth. For me, Summer Games became more than a seasonal programme; it became a leadership pathway through which I developed my skills across different roles, locations, teams, activities, and levels of responsibility.

Across several editions of Summer Games, I moved through multiple roles — from direct implementation as an animator and trainer, to coordination, supervision, site management, focal point responsibilities, and central activity leadership. Each role required a different leadership style and helped me build stronger skills in teamwork, communication, planning, problem-solving, child engagement, activity management, and large-scale coordination.

This journey reflects how leadership grows through practice. Every new responsibility became a station for learning, and every activity became an opportunity to serve children, support teams, and deliver meaningful educational and recreational experiences.

Leadership Stations Across Summer Games

Station 01 — Animator / Facilitator

My early Summer Games experience began with direct work with children through recreational and educational activities. This role strengthened my ability to communicate with children, create safe and engaging spaces, manage group energy, and transform activity plans into real participation.

Station 02 — Trainer / Activity Facilitator

As my responsibilities expanded, I became involved in training and facilitating activities that required preparation, explanation, motivation, and follow-up. This stage improved my ability to guide participants, support colleagues, and deliver activities with clear educational and recreational objectives.

Station 03 — Monitor / Field Follow-Up

Monitoring responsibilities helped me move from implementation to observation, evaluation, and quality follow-up. I learned how to assess activity flow, identify gaps, support teams, and ensure that activities were implemented safely and effectively.

Station 04 — Assistant Site Manager / Activity Manager

This stage introduced a higher level of operational responsibility. I supported site-level coordination, helped organize teams and schedules, followed up on daily challenges, and contributed to maintaining a structured and safe environment for children and staff.

Station 05 — Site Manager / Focal Point

As a site manager and focal point, my role expanded to full coordination responsibilities. I worked on team leadership, communication, logistics, problem-solving, reporting, and ensuring that the site operated smoothly according to programme expectations.

Station 06 — Central Activity Supervisor

At the central supervision level, leadership required a broader vision. I became responsible for supporting activities beyond one site, coordinating with multiple actors, following implementation quality, and helping align field activities with central programme goals.

Station 07 — Hikaya Central Activity

The Hikaya activity represented one of the most advanced stages of this leadership journey. It focused on presenting the homeland experience through creative, educational, and participatory activities. This stage strengthened my ability to manage a central theme, coordinate participants, organize visual and interactive outputs, and present a meaningful collective experience at the UNRWA level.

Hikaya: Turning Memory, Identity, and Participation into a Central Activity

The Hikaya activity was a central milestone in my Summer Games leadership journey. It was not only an activity, but a creative educational experience designed to help children express memory, identity, belonging, and the story of the homeland through participation, visuals, performance, and collective work.

Supervising this activity required advanced coordination, planning, teamwork, and the ability to transform a sensitive and meaningful theme into a structured, child-centered experience. Through Hikaya, I practiced leadership at a broader level: connecting ideas with implementation, supporting teams, guiding participants, and presenting an activity that reflected both creativity and social meaning.

This stage showed how Summer Games helped me grow from activity implementation to central activity leadership, where leadership became a tool for organizing people, protecting meaning, and turning participation into a shared educational experience.

Scan to watch Hikaya activity video

9- Deputy School Principal Leadership

As Deputy School Principal, my leadership role extended across multiple dimensions of school life. I was involved in supporting teaching and learning, following up on student behavior, coordinating with teachers, contributing to school improvement initiatives, supporting vulnerable students, and strengthening a positive school culture.

This role required daily presence, continuous communication, practical problem-solving, and the ability to balance administrative responsibilities with educational, human, and developmental priorities. It also allowed me to apply leadership in a real school environment where decisions directly affected students, teachers, families, and the overall learning atmosphere.

01

Teaching & Learning Follow-Up

As Deputy School Principal, I supported the daily follow-up of teaching and learning by monitoring classroom organization, reviewing educational progress, and coordinating with teachers to maintain a focused learning environment. This responsibility helped ensure that school operations remained connected to the core mission of improving student learning, supporting teachers, and strengthening educational quality.

02

Student Behavior & Discipline

Following up on student behavior was a central part of my school leadership role. I worked with teachers, students, and families to address daily behavioral issues, promote respect, encourage positive discipline, and protect a safe and organized school atmosphere. This area required patience, fairness, communication, and practical decision-making in response to real school situations.

03

Leadership for the Future

My participation in the Leadership for the Future programme contributed to strengthening my leadership capacity and supporting the development of the school team. The programme encouraged planning, communication, teamwork, reflective practice, and school-based improvement. It also helped connect leadership training with practical responsibilities inside the school environment.

04

Supporting Vulnerable Students

A key human dimension of my role was supporting vulnerable students, including orphan students and students with special needs. This responsibility reflected an inclusive leadership approach focused on care, dignity, follow-up, and equal participation. Supporting these students required coordination, sensitivity, and a strong belief that school leadership must protect every learner's right to belong and succeed.

05

School Greening & Environment

School leadership also included improving the physical and environmental atmosphere of the school. Through greening, planting, cleanliness, and school environment activities, we worked to create a more positive, healthy, and welcoming space for students and staff. These initiatives strengthened students' sense of responsibility, belonging, and respect for their learning environment.

06

School Team Meetings

Regular meetings with the school team were essential for coordination, planning, and shared decision-making. These meetings helped clarify responsibilities, discuss student and school priorities, follow up on implementation, and solve operational challenges. They also strengthened communication, teamwork, and professional commitment among staff members.

07

Student Recognition

Honoring high-achieving and distinguished students was part of building a positive school culture. Recognition activities encouraged motivation, confidence, commitment, and personal excellence. Initiatives such as honoring outstanding students and Fursan Al-Fajr helped reinforce positive values, celebrate effort, and show students that achievement, discipline, and participation are seen and appreciated.

08

Teacher Recognition

Teacher recognition was an important part of strengthening morale, belonging, and professional commitment. Honoring teachers acknowledged their efforts, supported a culture of appreciation, and encouraged continued dedication to students and school improvement. This dimension reflected my belief that successful school leadership depends on valuing the people who carry the educational mission every day.

These cards represent only a small part of my work in school leadership.

However, I chose to highlight these examples because they reflect achievements I am proud of and responsibilities that shaped my leadership practice.

Through these experiences, I learned that leading a school is not limited to administration; it is about supporting learning, guiding behavior, empowering teachers, caring for students, and building a positive school culture.

> **"Education is not only about delivering knowledge; it is about building people, shaping values, and opening doors for a better future."**

School Activities, Initiatives, and Events

Selected visual evidence of school activities, team meetings, student recognition, and school-based initiatives that supported a positive school culture.

Leading the School Team in a Regional Reading Initiative

When the Education Department announced participation in the Arab Reading Challenge at the UNRWA level, the challenge began for me before the competition itself started.

At that time, I was still a teacher. I was not yet in a formal school leadership position. This made the experience even more meaningful to me, because it proved that leadership does not always begin with a title. Sometimes, it begins with a teacher who believes in an idea and is willing to carry it with others until it becomes real.

This type of initiative was usually seen as the natural space of Arabic language teachers, English language teachers, or the school librarian. They were the closest to books, language, reading, and student literacy. However, when it was announced that the school team would be selected based on the strength of the proposed action plan, I saw the opportunity differently.

For me, this was not only a reading competition. It was a leadership challenge.

I believed that the success of the initiative would not depend only on specialization. It would depend on the ability to build a strong team, organize ideas, create a clear plan, motivate students, engage families, and turn reading from a school requirement into a living experience inside the school.

I began by forming a motivated team of around five teachers who were willing to work with me. The strength of the team was not only in its members, but in the spirit we built together. We discussed ideas, reviewed possibilities, shared responsibilities, and kept asking one essential question: how can we make reading attractive enough to reach the whole school?

The proposal stage was the first real test. Many teams had strong ideas and beautiful initiatives, so winning the opportunity to lead the Arab Reading Challenge inside the school was not easy. We had to present a plan that was practical, creative, organized, and capable of making a real difference. When our team was selected, it was an important moment in my leadership journey. It proved that leadership can emerge from initiative, teamwork, and belief, even before a person holds an official administrative position.

After the selection, the real work began.

We held several meetings to review the plan, refine the activities, identify needs, prepare resources, distribute responsibilities, and organize the implementation process. Step by step, the initiative moved from paper to reality.

Then the school began to change.

Reading was no longer limited to the classroom or the library. It became visible in the daily life of the school. Students participated in reading activities, discussions, visits, celebrations, competitions, awareness events, and creative school-based initiatives. We also used digital platforms and tools to support engagement, follow-up, and communication, making reading closer to students and more connected to the way they learned and interacted.

Parents were also part of the journey. We communicated with them, invited them into the experience, and encouraged their involvement in supporting their children. Their presence added a human depth to the initiative. It showed students that reading was not only a school activity, but a shared value supported by teachers, families, and the wider school community.

The initiative targeted the whole school community of approximately 970 students. Around 230 students were directly involved in the core activities, and nearly 30 different activities were implemented, including training sessions, visits, reading activities, celebrations, digital engagement, parent participation, and student-centered events.

Behind these numbers was the real story: the school atmosphere became more alive. Students began to visit the library more frequently. Book borrowing became a daily practice. Reading activities became part of the school routine. Library visits reached at least 100 students per day, and around three quarters of the school students became engaged with reading initiatives in one way or another.

Although we were not fortunate enough to qualify at the national level, the experience did not end with that result. In fact, this was the moment when the real success began.

Instead of treating the result as a loss, we asked ourselves a deeper question: how can we keep this project alive?

We realized that the value of the Arab Reading Challenge was much greater than qualification or competition results. The initiative had changed the school atmosphere. It had encouraged students to read, motivated teachers to work together, brought parents closer to the school, strengthened students' sense of belonging, and created a new daily relationship between students and books.

From that point, the project moved from being a temporary competition activity to becoming a sustainable school practice. Under the leadership of the school principal and with my coordination as a teacher leading the initiative, the idea expanded into a wider school effort. The activities were adapted and repeated according to students' needs, available resources, and the school context.

One of the strongest signs of sustainability was the implementation of a 14-day winter reading camp during the winter vacation. Students continued participating in reading, cultural, creative, and educational activities even outside the regular school schedule. This was a powerful moment for me, because it showed that the initiative had moved beyond formal participation. Reading had become something students wanted to return to.

What began as an announcement became a challenge. What began as a challenge became a selected plan. What began as a selected plan became a school movement. And what began as a school movement became a sustainable reading culture.

This experience taught me that leadership is not only about winning official titles or qualifying in competitions. Sometimes, the deepest success appears when a team refuses to stop after disappointment and chooses instead to build something that lasts.

The Arab Reading Challenge became one of the projects I am most proud of because it changed how students saw reading, how teachers worked together, how parents connected with the school, and how the school lived its daily educational mission.

It proved to me that a book can open a student's mind, but leadership can turn reading into a culture that lives inside the school.

11- Digital Leadership During COVID-19

Using Technology to Support Learning Continuity

During the COVID-19 school closures, learning suddenly moved from classrooms to homes. At that time, my programming background and computer skills became a practical leadership tool. I used available digital platforms and communication channels to support students, teachers, and families in maintaining learning continuity under difficult and unfamiliar conditions.

My role was not limited to sending educational materials. I helped organize digital communication, prepare and share learning tasks, respond to students' and parents' questions, support follow-up, and keep students connected to school despite the physical distance.

Through online groups, digital files, remote explanations, and continuous communication

with families, we were able to reduce the gap created by school closure. Parents became active partners in the process, and students continued receiving learning support from home.

This experience showed me that digital leadership is not only about technology. It is about using technology to organize people, simplify learning, support families, and keep education alive when the normal school environment is no longer available.

Although this period was difficult to document through field photos, the available screenshots, online communication records, shared learning files, and video links provide evidence of the digital effort that supported students during one of the most challenging educational disruptions.

Psychosocial and Recreational Support for Students Facing Serious Illness

Some leadership experiences are not measured by numbers, certificates, or official results. They are measured by a child's smile, a family's relief, and a community's ability to come together around those who need support the most.

This initiative provided psychosocial and recreational support for students facing serious illness. It brought together children, families, educators, community representatives, and volunteers in a shared moment of care, joy, and solidarity.

For me, this was a reminder that educational leadership is deeply human. A school does not only teach students; it stands with them in difficult moments, protects their dignity, celebrates their courage, and helps them feel that they are not alone.

13- Academic Leadership Development

My master's degree journey was one of the most important academic milestones in my leadership development. I began my graduate studies in 2014 and completed the programme in 2017, during a period in which I was also actively involved in educational, school-based, and community work.

My master's thesis focused on agile leadership, a concept that strengthened my understanding of adaptability, flexible decision-making, responsiveness, team empowerment, and leading effectively in changing environments. This academic focus later became deeply connected to my practical leadership experience, especially in school leadership, emergency education, digital learning during COVID-19, and educational recovery during war.

This stage strengthened my understanding of leadership as both knowledge and practice. It helped me connect academic concepts with real educational challenges, team development, community initiatives, and school leadership responsibilities.

Graduating with Excellence with Honors and achieving a cumulative average of 92.07 reflected not only academic achievement, but also discipline, commitment, and the ability to balance study, professional work, and community engagement.

The transcript included in this portfolio provides official evidence of this academic achievement and represents a foundation that supported my later leadership journey in education, emergency response, digital learning, and community development.

Official academic transcript documenting the completion of my master's degree with Excellence with Honors and a cumulative average of 92.07.

14- International School Award

Leading Global Citizenship Projects and Cross-Cultural School Partnerships

The International School Award experience was one of the important milestones in my educational leadership journey. It connected school leadership with global citizenship, cross-cultural learning, international collaboration, and student-centered project work.

During this initiative, I contributed to preparing and coordinating a comprehensive school portfolio that documented international projects, school activities, partnerships, future plans, student participation, and evidence of implementation. The work required planning, teamwork, documentation, communication, activity design, and continuous follow-up with the school team.

The initiative included several projects addressing global and cultural themes, such as international days and festivals, cultural dialogue, identity, Gaza, animal care, children's rights, and other topics connected to students' awareness of the wider world. Through these projects, students were encouraged to think beyond the classroom, connect local experiences with global issues, and participate in meaningful educational activities.

This experience strengthened my understanding of education as a bridge between cultures. It also helped me practice leadership through documentation, international project planning, school-community engagement, and the organization of evidence-based educational work.

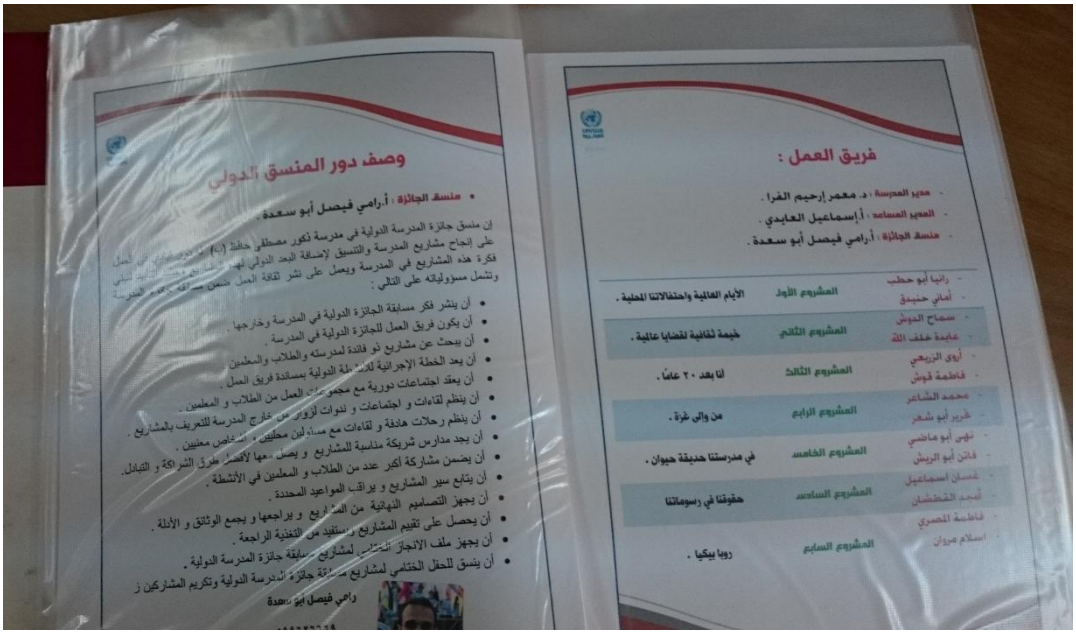

For me, the International School Award was not only a school achievement. It was a practical model of how schools can open students' minds to the world, promote dialogue, and transform learning into a shared global experience.

Project Planning and Portfolio Preparation

• Documented Projects and Participating Team

The portfolio included a clear list of the implemented projects, the school leadership team, the award coordinator, and the participating teachers. This documentation reflected that the initiative was not an individual activity, but a structured school-wide effort based on shared responsibility, distributed roles, and collaborative implementation.

A documented page from the International School Award portfolio showing the full working structure of the initiative. The page includes the school leadership team, my role as the International School Award coordinator, the participating teachers, the titles of the implemented projects, and the person responsible for each project. It also records the coordinator’s responsibilities, including project planning, task distribution, implementation follow-up, evidence collection, documentation, communication with teachers, and preparation of the final portfolio as part of the school’s international education work..

Implemented Project Titles

1. International Days and Local Festivals
2. Cultural Tent for Global Issues
3. Who Am I After 20 Years?
4. From and To Gaza
5. A Zoo in Our School
6. Our Rights Portrayed in Our Paintings
7. Roubia Bikia

School Team and Participating Teachers

The school leadership and coordination team included:
• School Principal: Dr. Muammar Ibrahim Al-Ghara
• Assistant Principal: Mr. Ismail Al-Abadi
• International Coordinator: Mr. Rami Faisal Abu Sadaa
The participating teachers and project responsibilities were documented as follows:
• International Days and Local Festivals:

Rania Abu Hatab and Amani Hunaideq
• Cultural Tent for Global Issues:

Samah Al-Doush and Aida Khalil Allah
• Who Am I After 20 Years?:

Arwa alzreay and Fatima Gawash
• From and To Gaza:

Mohammed Al-Shaer and Tahreer Abu Shaer
• A Zoo in Our School:

Noha Abu Madi and Faten Abu Al-Reesh
• Our Rights Portrayed in Our Paintings:

Gasan Ismail and Amjad Al-Gatshan
• Roubia Bikia:

Fatima Al-Masri and Islam Marwan

15- Additional Recognition and Activities

A Visual Album of Selected Leadership Moments

With two distinguished students during the Top Students Recognition Ceremony.

With distinguished students who memorized the Holy Qur'an.

With senior education leaders in Gaza City.

During my leadership of the 8th Top Students Ceremony.

A recognition moment honoring a retired school principal.

During the opening of the Science Exhibition with senior UNRWA education leaders.

Honoring students during the Top Students Ceremony.

Receiving recognition from the Area Director during the Harvest Festival honoring creative teachers.

Receiving recognition from school principals during the 2019 ceremony.

Receiving recognition from a parent in appreciation of our efforts.

With the UNRWA Area Operations Officer during an official educational event.

Receiving recognition during an internal festival organized at the educational area level.

16- Leadership Reflection and Closing

The experiences presented in this portfolio began in 2007 and represent important milestones in my professional and leadership journey. However, they do not tell the whole story. Many personal, professional, academic, and community experiences were summarized or left out because of the limited space of this portfolio.

This final section is not written as an ending. It is written as the beginning of the next chapter.

After presenting what I have done, I now present what I am working toward: a strategic leadership vision shaped by recovery, education, service, institutional development, and future impact.

Strategic Leadership Compass

This Strategic Leadership Compass summarizes the main directions of my next leadership journey. It moves from personal recovery and stability toward institutional leadership, academic growth, digital innovation, and continued community service.

For me, the future is not only about rebuilding what was lost, but also about transforming experience, crisis, education, and service into a clearer leadership path.

Future Roadmap

2026

Portfolio completion, strategic preparation, rebuilding stability, and strengthening professional direction.

2027

Expanding educational, digital, and community projects with stronger institutional organization.

2028

Beginning doctoral studies and deepening academic research in leadership and educational development.

2029

Transforming research, field experience, and technology into practical leadership models.

2030

Building sustainable initiatives that connect school leadership, community service, and digital transformation.

Challenges

- Displacement, instability, and interrupted education.
- Severe limitations in infrastructure and learning resources.
- Rebuilding personal, family, and professional stability.
- Supporting children and teams under prolonged crisis conditions.
- Maintaining educational continuity amid uncertainty.
- Bridging digital and institutional gaps.
- Turning accumulated loss into a sustainable future direction.

Leadership Response

- Resilience and disciplined planning
- Rebuilding personal and family stability
- Using education as a recovery tool
- Investing in academic growth
- Developing digital solutions
- Serving students and communities
- Turning crisis into long-term purpose

This strategic vision is not the end of my story; it is the starting point for a new stage of creativity, growth, and purposeful leadership. Joining this training programme is an important part of my future plan, as I look forward to learning from your expertise, strengthening my leadership capacity, and turning the knowledge gained into practical impact for my personal development, my institution, and the community I serve.

> **Leadership is turning loss into purpose, and purpose into lasting impact.**

THANK YOU

THANK YOU FOR TAKING THE TIME TO EXPLORE
MY LEADERSHIP JOURNEY.

LEADING PEOPLE. INSPIRING CHANGE.
BUILDING A BETTER FUTURE.
